

INSTRUCTIONS FOR JET PUMP PLUG REPLACEMENT ON HOT SPOTS

The HOT SPOT has a new jet pump cord assembly. Beginning with spa serial number Z 140334, the receptacle in the control box is now smaller and will not fit the old style cordset from the pump.

When changing a complete control box in a unit prior to the above serial number, the old style cordset needs to be replaced with a new style cordset. The part number of the new style is 70826.

Refer to the following instructions to replace the old style cordset:

1. Remove the screws holding the pump motor cover on. Remove the pump motor cover.
2. Loosen the cordset lock on the side of the pump.
3. Remove the wires from the various terminals.
4. Remove the ground wire from the ground lug.
5. Remove the old plug cord.
6. Install the new style plug cord through the cordset lock.
7. Install the wires to the terminal blocks. Refer to the following chart to determine the proper wiring of the pump:

Wire	Terminal
White	C
Black	H
Red	L
Green	Ground Lug

8. Tighten the cordset lock to secure the new plug.
9. Reinstall the pump motor cover.
10. Plug new style plug into the control box.
11. Verify the operation of the spa.
